

Geometri-jakt

Förberedelser:

Skriv ut tvillingkortet och plasta in. Gör ett hål i kortet med geometriskt objekt. Häng upp dessa på skolgården, i skogen eller i klassrummet. Kortet utan text lägger du i en korg eller skål.

Så här går leken till:

Låt eleverna ta ett kort ur korgen. De får till uppgift att leta upp tvillingkortet, som hänger någonstans på skolgården/i skogen/i klassrummet.

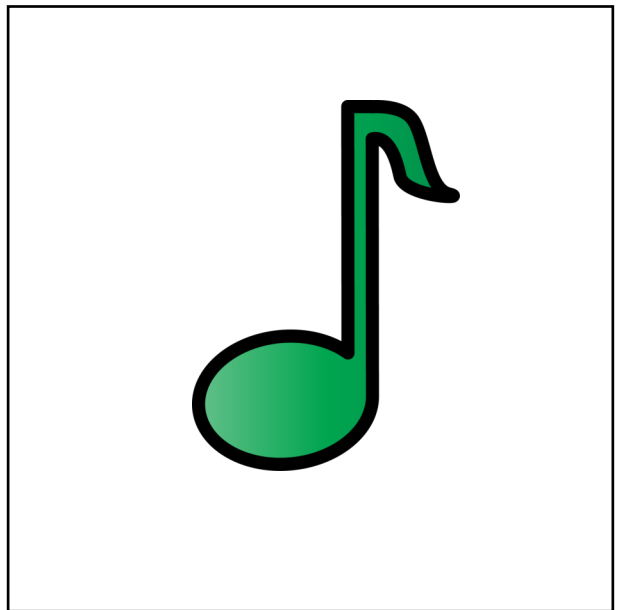

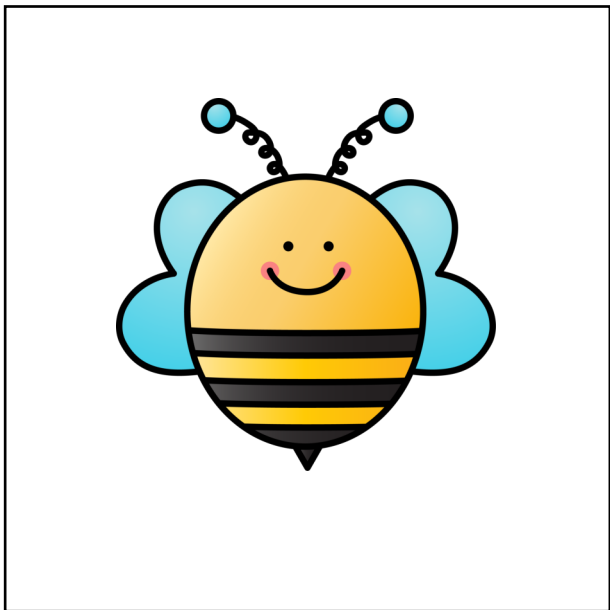

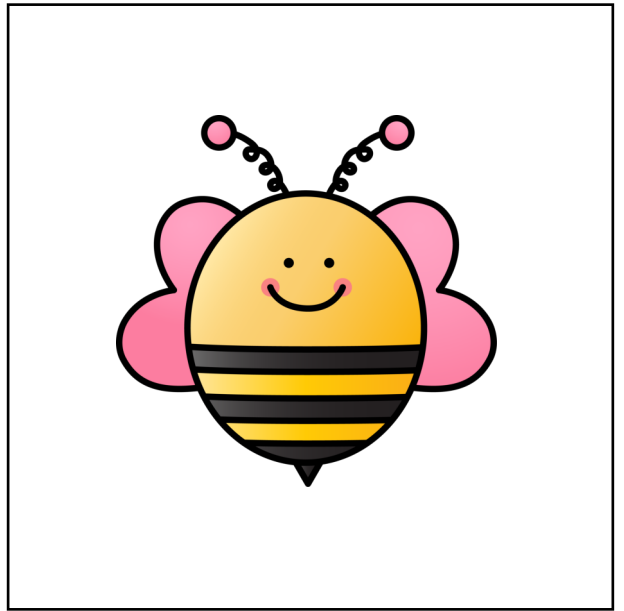

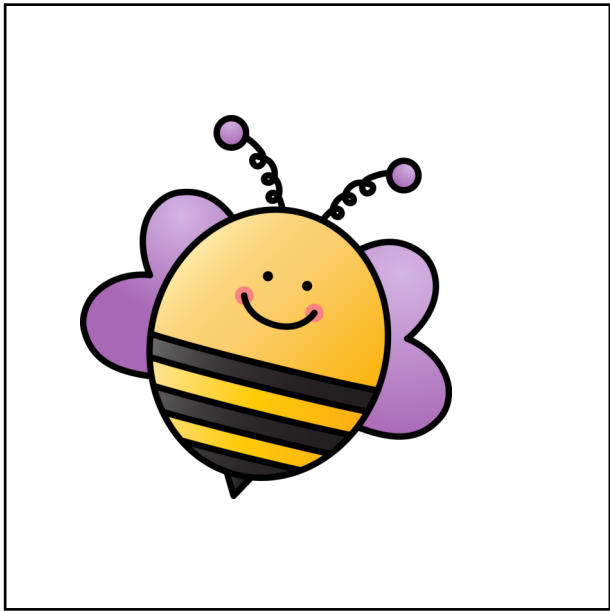

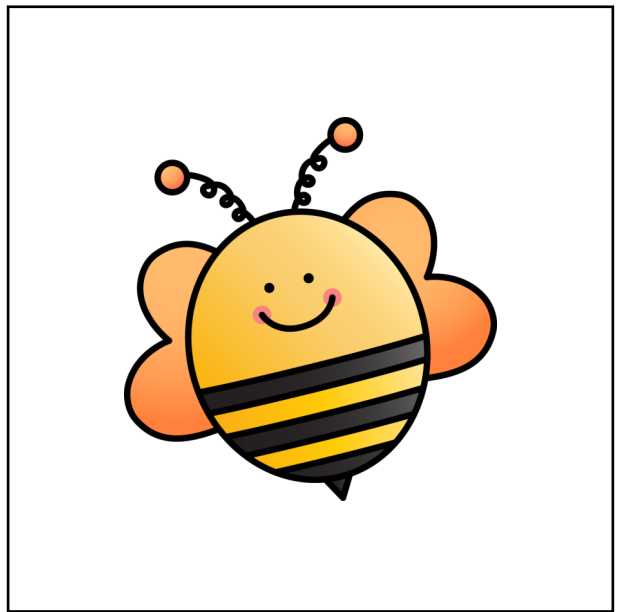

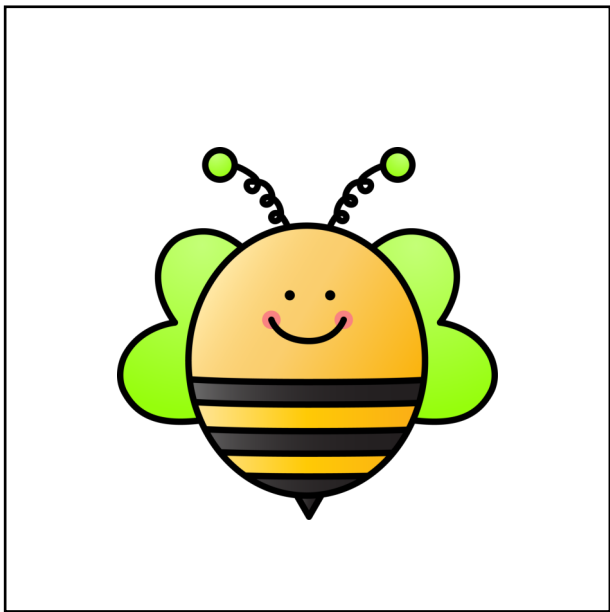

Eleverna ser efter vilken geometriskt objekt som finns på tvillingkortet. De går sedan tillbaka och berättar vilket objekt de just sett.

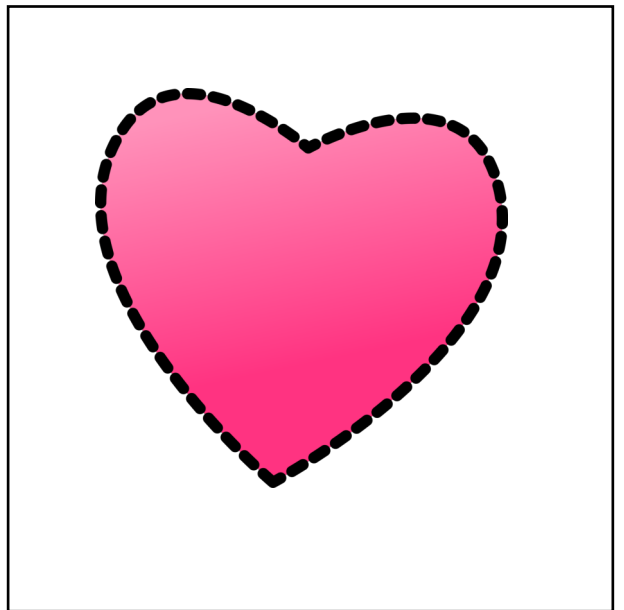

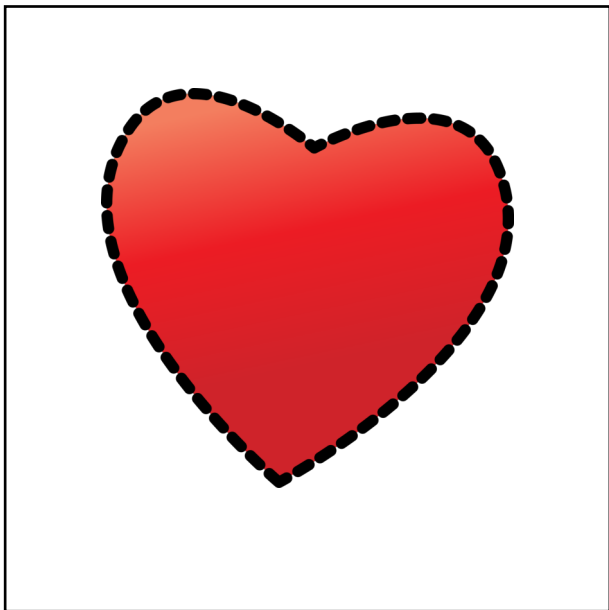

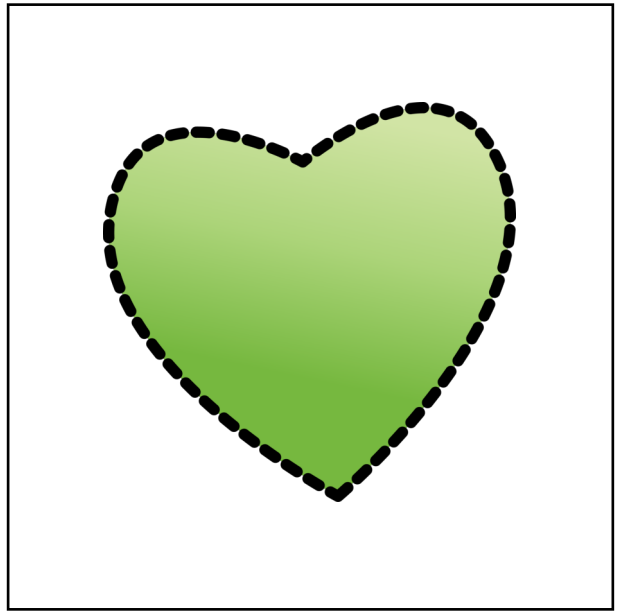

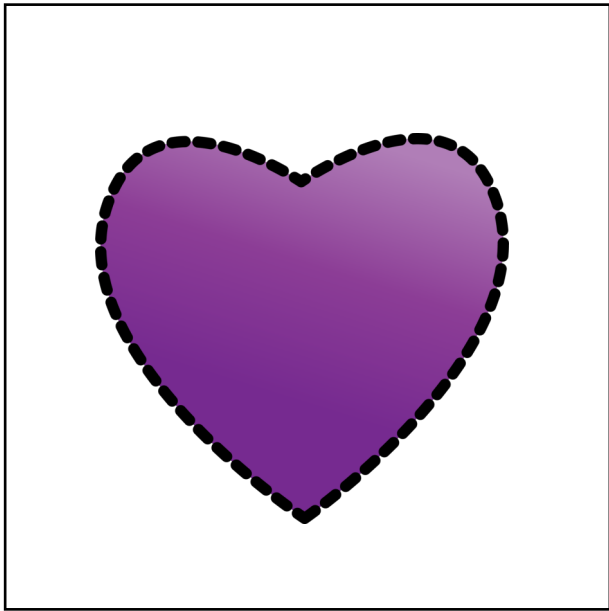

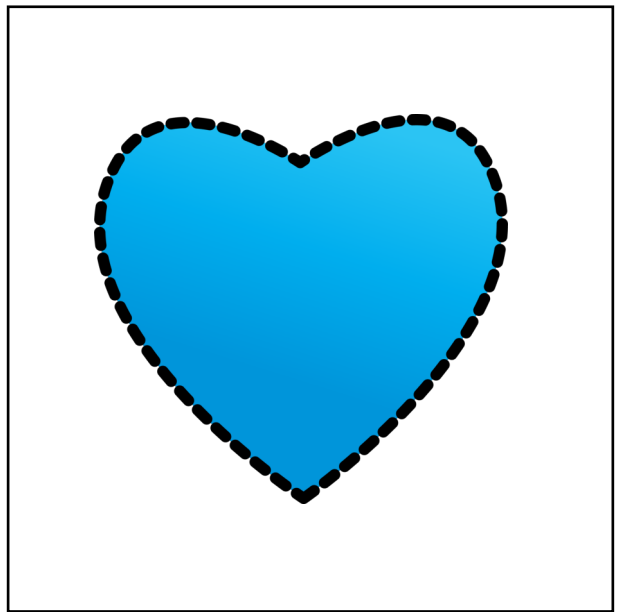

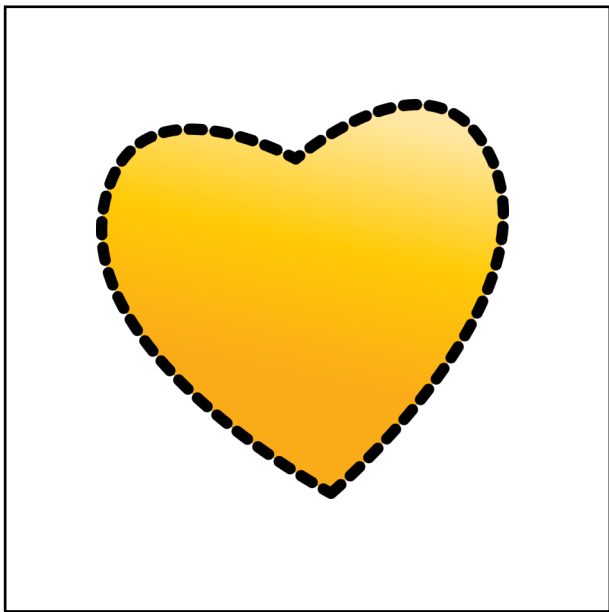

Eleverna tar ett nytt kort och hittar dess tvilling.

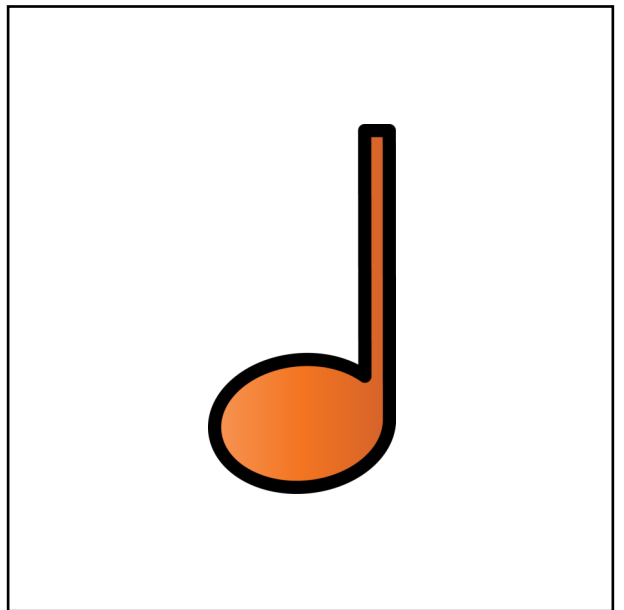

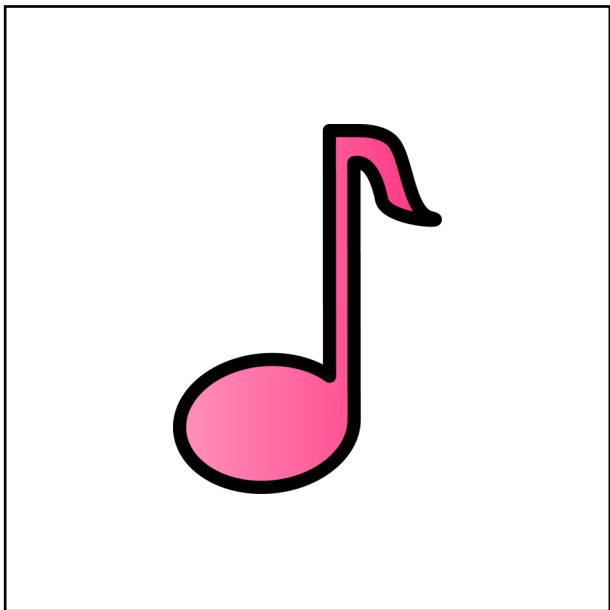

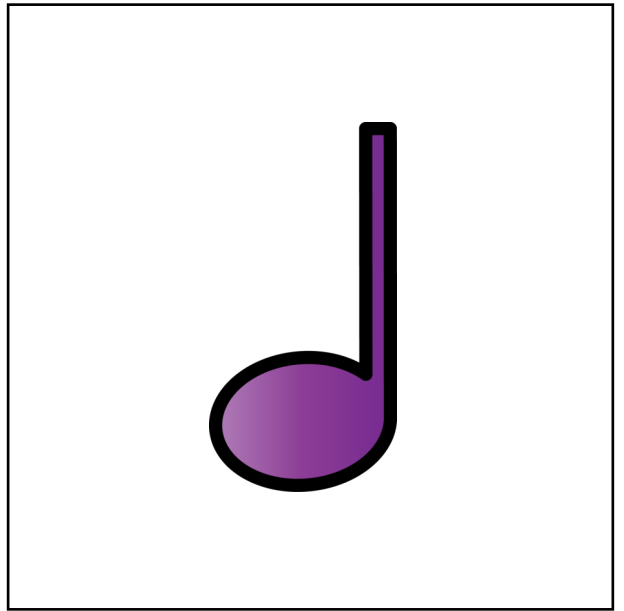

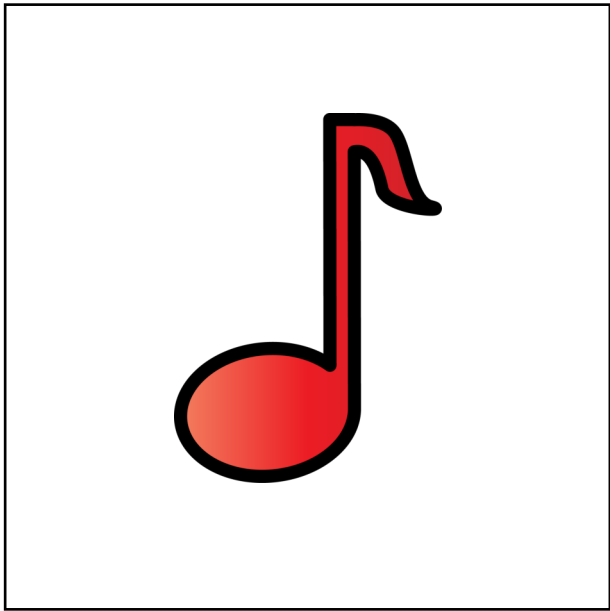

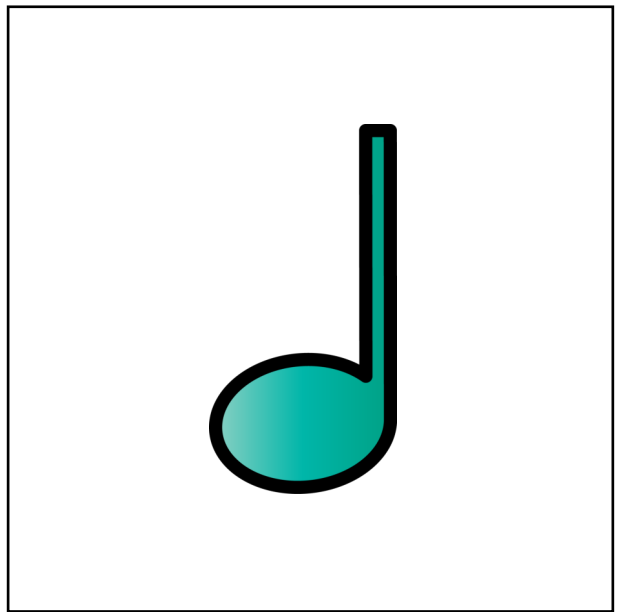

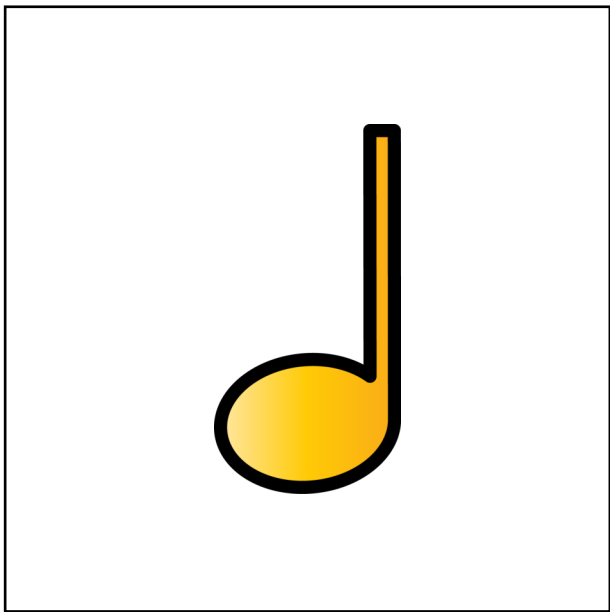

Utmaning: Be eleven berätta hur hen känner igen just det objektet.

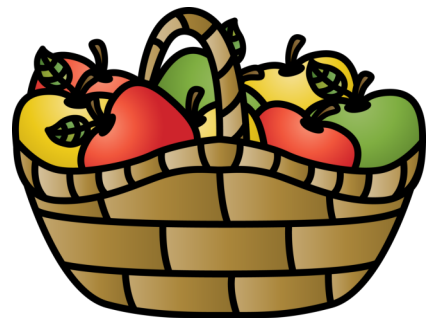

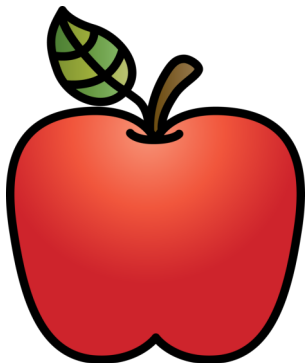

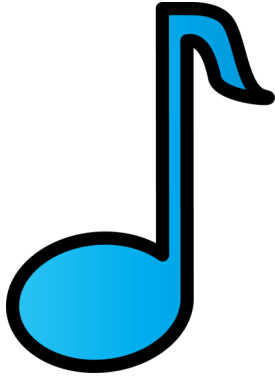

Vi tränar på att känna igen och namnge:

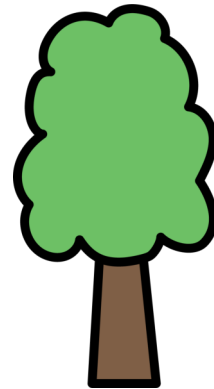

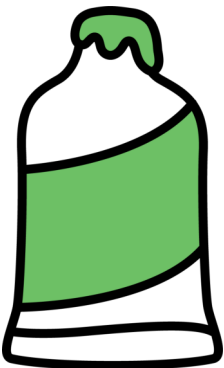

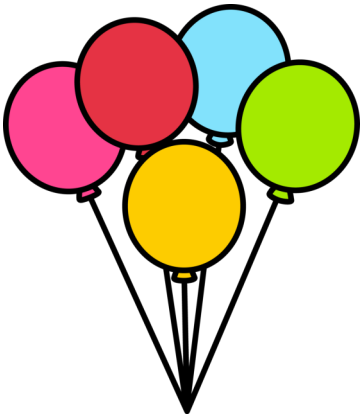

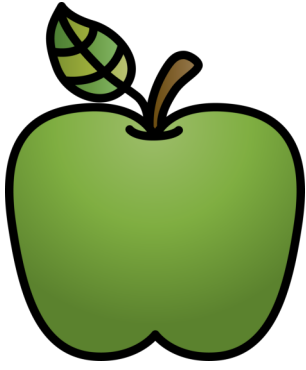

cirkel, triangel, kvadrat, rektangel
